

CLEW Applicant

PRODUCT

CDI Livescan Enhanced Workstation (CLEW)

(Shown with the Microsoft Surface Pro 3)

The CLEW Applicant Livescan Workstation gives customers the ability to quickly and accurately capture fingerprints and demographic information. This allows the creation of an Applicant Transaction for submission to California DOJ and the Federal Bureau of Investigation for a criminal history background check. Both state and federal application submission types can be run on the same PC/Workstation.

CLEW utilizes standard TCP/IP network infrastructure and security supporting the most common application protocols. CLEW implements industry standard EBTS interfaces and can quickly integrate into any customer's workflow.

Advantages of CLEW Applicant Software

- Complete Livescan fingerprint capture system for Applicant processing
- Intuitive user interface minimizes user errors and training
- Finger sequence and real time quality checking to improve the quality of the captured data
- Automated finger positioning
- Field capable, can be run standalone with or without network connectivity Easy set-up and take-down for the portable configuration
- **The ONLY portable livescan system on the market that weighs LESS than 2 lbs!**
